

Welcome to Ophthalmology Associates! Thank you for choosing us for your complete eye care needs. Our goal is to provide you with the best possible care in a pleasant and efficient manner. This involves treating each patient as an individual with a unique set of circumstances, and carefully educating the patient and family about your complete eye health, as well as various diagnostic tests or treatment measures that are available. The following packet has been provided to help prepare you for your upcoming visit. In order to receive the most effective care, we ask that you bring the following with you to your initial appointment.

- Attached completed forms
- Medical and Vision insurance cards
- Drivers license or other form of photo identification
- Complete list of current medications; dosage and frequency
- Current prescription of eye glasses or contacts (contact box)
- (If) you are being referred to us by another ophthalmologist please bring medical records
- (If) you require any type of special assistance please contact our office before the visit

New patient appointments may take 2½ to 3 hours. As part of a thorough new patient exam your eyes may be dilated. Dilation typically remains for 4-6 hours after your examination. During this time your near vision will be compromised and you will experience light sensitivity. Therefore, before leaving our facilities we will provide you with disposable sunglasses. Most people are able to drive following dilation, but you may want to bring a driver if you have experienced problems driving in the past, or if your eyes have never been dilated.

If your insurance requires that you have a referral from your Primary Care Physician, please call their office to obtain your referral prior to your appointment. Failure to obtain a referral could delay your appointment. All co-payments and any additional services not covered will be collected at the time of your appointment.

Please call your insurance should you have any questions regarding coverage. You will be held responsible for any fees not covered by insurance.

Please note: For all patients under the age of 18, a parent or legal guardian must accompany him or her.

We encourage you to visit our website at www.youreyedoc.com where you will find educational videos, frequently asked questions, and more.

To make your experience with Ophthalmology Associates as efficient as possible, we ask that you complete the attached forms prior to your arrival. Should you have any questions for us prior to your visit, please do not hesitate to call. We look forward to meeting you soon.

Sincerely,

Ophthalmology Associates Physicians and Staff
